Open Letter

January 31, 1966

TO: Vice Admiral George G. Burkley (MC) USN
Physician to Lyndon B. Johnson

They Die Today!

As I write this letter, today, thousands of our youth in Viet Nam move out to slaughter and be slaughtered: in planes shot down, in the muddy waters of the Makong Delta, in malarial marshes, and by blistering fire; as thousands of Vietnamese, north and south, including women and children, die of bombings, poisoned gasses, scorched earth tactics, and other inhuman acts of terrorism, "by order" of Lyndon B. Johnson, Escalated, illegal wars; hypocritical, cynical "peace offensives" to force a world diplomatic surrender to his illegal entry into Viet Nam where we have no legal right to be, and which serves no purpose for our people; accomplished to advance the Wall Street - Vatican war of annihilation; leading inevitably to an H-Bomb "Blitz" stemming from the maniac conclusion that the communist world would not dare challenge his invincible powers. These are the strategies of an insane man, Lyndon Johnson, whom you serve.

I lay these crimes at your door! Your hands, and face, and Navy uniform are spattered with the blood of innocents. You know, as a doctor, that this man is an ego-maniac... suffers from delusions of grandeur... from hallucinations of invincibility... from excessive feminine vanity... is a political "prima donna" who demands the center of the stage and all of the applause, coupled with a deadly vindictiveness which commands "Off with his head!", for all who cast a shadow upon his effulgent light... a chronic alcoholic who makes vital decisions from the bottom of an emptied Bourbon bottle (as tacitly implied by the article by Will D. Moyers: "Decision Making Process of the President is Inscrutable", in which he states "the following morning he has come out on the other side of the question" - we may safely assume, when he has finished the fifth of Bourbon; the advice of consultants long forgotten; the people never consulted; opposing views ruthlessly overridden by threats of political reprisals and slanderous of the ~~enab~~ collaborating press.

His lunatic, murderous acts, in which he is backed by other lunatics on his staff, make him the world's most dangerous criminal! You are, in practical effect, his "keeper" responsible to the people of the United States and to the world, holding the power, through routine, obvious medical decision, to prevent the holocaust he holds over our heads. Instead, you cover up his idiot violences which have already hospitalized him once, and irresponsibly proclaim him physically and mentally fit to be President of the United States, thus freeing his hands for further bloody crimes.

In this situation we come to one of two conclusions: (1) that you are sane, and are an active collaborationist in his crimes - a politician, not a doctor - which is certainly true if you are a Roman Catholic obedient to the Pope; or (2) that you are as crazy as he is; unable to tell right from wrong; between criminal outlawry and law-abiding citizenship; a willing accessory before and after the fact of his felonious usurpation of the office of President; and as a Doctor of Medicine, are doubly dangerous. The day already dawns when criminals will be taught that crime does not pay. If it is held that you, LBJ, McNamara, Rusk, Roborn, Moyers, and the rest of the collaborating War Hawks are sane, obvious punishment for murder and treason will then automatically follow. If, on the other hand, it is held that you are all insane, then the logical action will be to confine you in the specially-created Hell Hold at the Springfield, Mo., Mental Hospital (with overflow into St. Elizabeth's Hospital in near-by Anacostia), where so many political enemies of JFK, LBJ and the White House Mafia have been incarcerated and given lobotomy operations. In either event you will have brought it upon yourselves, and cannot complain if the chips from the sharp hewing fall your way.

BY ORDER OF THE CONSTITUTION OF THE UNITED STATES:

Herbert C. Holdridge
Herbert C. Holdridge, Brig. Gen. US Army (Ret), - "Bringing A Message!"

CHIEF MAGISTRATE

VIA AIR MAIL

Lt. Gen. Leonard D. Heaton
Surgeon General, US Army
The Pentagon, Washington DC
